

220V Transformer Winding Machine with PLC Control System Wire Feeding Length 0-9999mm

Our Product Introduction

for more products please visit us on jc-transformer.com

Basic Information

- Place of Origin: China
- Brand Name: JC
- Certification: SGS CE,UL
- Model Number: 90Q0
- Minimum Order Quantity: 1 pcs
- Price: consult
- Packaging Details: Export standard packaging
- Delivery Time: 5 days
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 100pcs/month

Product Specification

- Wire Feeding Length: 0-9999mm
- Coil Form: Circular, Oblong, Elliptical, Rectangular
- Warranty: 3 Years
- Power Supply: AC380V/50Hz
- Wire Feeding Speed: 0-1000rpm
- Product Name: Intelligent Pressure Roller Winding Machine For Low Pressure Transformers
- Wire Specification: Enameled Wire
- Winding Angle: 0-360°
- Highlight: Wire Feeding Length Transformer Winding Machine, 220V Transformer Winding Machine, PLC Control System Transformer Winding Machine

Product Description

Product Description:

The machine comes with an Uncoiling and Rectifying Device that allows for the smooth uncoiling of wire. This ensures that the wire is fed into the machine at a consistent speed, which is important for achieving high-quality coils. Additionally, the machine is equipped with a Foil Winding Machine that allows for the winding of coils with precision and accuracy.

The Transformer Winding Machine is equipped with an Electronic Control System that allows for precise control over the winding process. The Control System is based on PLC technology, which ensures that the machine operates smoothly and efficiently. The Control System allows for the adjustment of a range of parameters, such as the Wire Feeding Speed, Winding Pitch, Wire Tension, and Wire Specification.

The Wire Feeding Speed of the Transformer Winding Machine can be adjusted from 0-1000rpm. This allows for a high level of control over the winding process, which is important for achieving consistent results. The Winding Pitch can also be adjusted from 0-999mm, which allows for the production of coils with a range of sizes and specifications.

The Wire Tension of the Transformer Winding Machine can be adjusted from 0-2.5Kg. This ensures that the wire is fed into the machine at the correct tension, which is important for achieving high-quality coils. The machine is designed to work with Enameled Wire, which is a popular choice for transformer coils due to its excellent insulation properties and durability.

The Transformer Winding Machine is an excellent choice for anyone involved in the production of transformer coils. Its advanced features and precise control system make it highly efficient and easy to use. Whether you are a small-scale manufacturer or a large industrial producer, this machine can help you achieve consistent results and improve your production efficiency.

Features:

Product Name: Intelligent pressure roller winding machine for low pressure Transformers
Winding Angle: 0-360°
Power Consumption: 2.2KW
Winding Speed: 0-1000rpm
Wire Tension: 0-2.5Kg
TIG Layer Insulation Welding Device
Foil Coiling Machine
Electric transformers
Available in one ton or two ton

Technical Parameters:

Product Name	Intelligent pressure roller winding machine for low pressure Transformers
Axial Height Of Coil	≤ 800mm
Outer Diameter Of Wire Coil	≤ 600mm
Coil Form	Circular, Oblong, Elliptical, Rectangular
Winding Angle	0-360°
Wire Tension	0-2.5Kg
Wire Feeding Speed	0-1000rpm
Power Supply	AC380V/50Hz
Warranty	3 Years
After-sales Service	3 Years

This Electronic Control System Foil Coiling Winding Machine is suitable for the winding of various types of Electric transformers.

Applications:

This Transformer Winding Machine is a must-have for anyone working with electronic control systems, requiring a foil coiling winding machine. Its wire range of 0.2-2.0mm and axial height of coil of up to 800mm, ensures that it can handle a variety of winding needs. It is also equipped with an intelligent pressure roller winding machine ensuring that the winding process is efficient and accurate. With a power consumption of 2.2KW, this Transformer Winding Machine is energy efficient, reducing your energy costs. It also comes with a 3-year after-sales service guarantee, providing you with peace of mind and ensuring that any issues you may encounter are resolved promptly. Overall, the JC 90Q0 Transformer Winding Machine is the ideal solution for anyone working with electronic control systems, requiring a foil coiling winding machine. Its high-quality, efficient, and accurate winding capabilities make it a must-have for anyone working with electric transformers. Contact us now to place your order!

Support and Services:

This Transformer Winding Machine product comes with comprehensive technical support and services to ensure smooth and efficient operation. Our team of experienced technicians is available to provide on-site installation, training, and maintenance services to assist you throughout the lifespan of the machine. In addition, we offer remote technical support via phone or email to quickly address any issues that may arise. Our goal is to provide you with reliable and timely support to minimize downtime and maximize productivity.

Packing and Shipping:

Product Packaging:
The transformer winding machine will be packaged securely in a sturdy cardboard box.
Inside the box, the machine will be wrapped in bubble wrap to protect it from any damage during shipping.
All necessary cables, manuals, and accessories will be included in the package.
Shipping:
Our team will ship your order within 2 business days of receiving it.
We ship globally using various shipping carriers.
Delivery times may vary depending on your location.
You will receive a tracking number once your order has been shipped.

FAQ:

Q1: What is the brand name of this Transformer Winding Machine?

A1: The brand name of this Transformer Winding Machine is JC.

Q2: What is the model number of this Transformer Winding Machine?

A2: The model number of this Transformer Winding Machine is 90Q0.

Q3: What certifications does this Transformer Winding Machine have?

A3: This Transformer Winding Machine has SGS, CE, and UL certifications.

Q4: What is the minimum order quantity for this Transformer Winding Machine?

A4: The minimum order quantity for this Transformer Winding Machine is 1 piece.

Q5: What are the payment terms for this Transformer Winding Machine?

A5: The payment terms for this Transformer Winding Machine are L/C, T/T, Western Union, and MoneyGram. Please consult for the price.

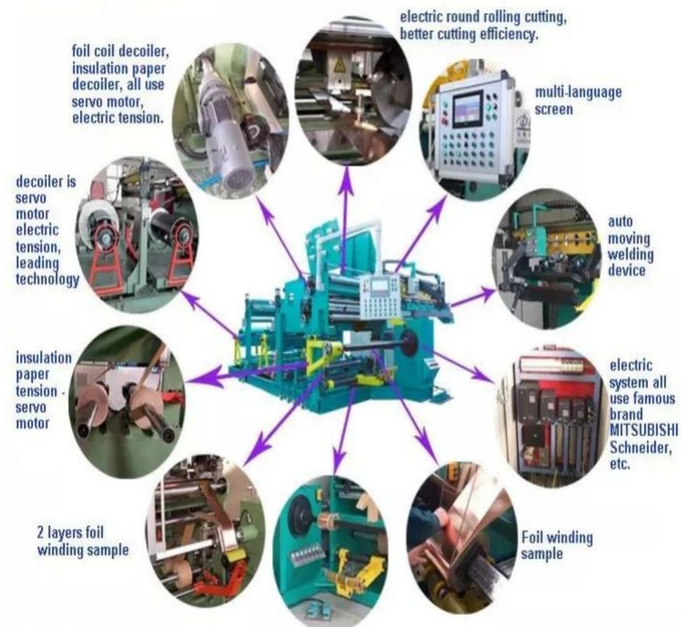

Q6: What is the supply ability and delivery time for this Transformer Winding Machine?

A6: The supply ability for this Transformer Winding Machine is 100 pieces per month, and the delivery time is 5 days. The machine comes in export standard packaging.

Foil Winding Machine Structure

Single Layer Foil Winding Machine for 10 to 1100kv Insulators
